Features that should be added to Holy Quran App:

1. **Enhance Loading Time:** Optimize the app's loading speed for a more seamless user experience.
2. **Ensure Smooth Language Selection**: Improve the functionality of language selection to ensure effortless switching between languages.
3. **Enhance Ad Experience**: Refine the ad presentation for a more user-friendly encounter within the app. There are excessive ads while using the app.
4. **Integrate Word by Word Translation**: Include a feature for a detailed, word-by-word translation of Quranic verses to aid comprehension.
5. **Incorporate Ruku Viewing**: Enable users to easily navigate and view specific Rukus within the Quran.
6. **Enable Ayah Sharing**: Facilitate the sharing of individual Ayahs for ease of reference and communication.
7. **Introduce Qaida for Basic Learning**: Integrate a Qaida module specifically designed for children to facilitate foundational Quranic learning.
8. **Allow Customized Notes per Ayah**: Provide users with the capability to add personalized notes alongside individual Ayahs for personal reference and study.
9. **Include Tafsir for Deeper Understanding:** Incorporate a comprehensive Tafsir module to assist users seeking a deeper understanding of Quranic verses.
10. **Integrate Hadith Module:** Add a dedicated section for Hadiths, catering to users interested in related prophetic traditions and teachings.

11. **Search functionality should be added in the AL Quran section .**User should be able to view some results even if he enter a single relevant word for the desired surah.

12. In the **Al Quran section**, consider integrating an enhanced search feature.
    - Enable users to retrieve relevant results even with a single keyword input for their desired Surah. This functionality will empower users to efficiently access specific verses or chapters, enhancing their overall experience with the application.
